### Report of the Nominating Committee

The Committee on Nominations and Elections presents its slate of nominees for offices to be filled in the 1959 election. The term of office for the two vice-presidents is two years. Three directors are to be elected for terms of three years.

In making nominations for the three director positions, the Committee followed the directive adopted by the Board of Directors in 1955 which states, "Nominations shall be made so that there shall be not more than one director elected from each state, and that there shall be one director, and not more than two, elected from each region." Members may consult *The Mathematics Teacher* for October, 1955, for a map of the regions as they are now defined.

Ballots will be mailed on or before February 10, 1959 from the Washington Office to members of record as of that date. Ballots returned and postmarked not later than March 10, 1959 will be counted.

The committee wishes to thank the many members of NCTM for their help in giving

their suggestions for nominees. It is hoped that all members of our organization will exercise their privilege of voting.
